

## E-mail Server Settings

Amplex E-mail Server Settings are listed below.

Incoming Mail Server Type: **POP3**

Incoming Mail Server: **mail.amplex.net**

Incoming Server Port: 995 (Encrypted/TLS)

---- OR ----

Incoming Mail Server Type: **IMAP**

Incoming Mail Server: **mail.amplex.net**

Incoming Server Port: **993 (Encrypted/TLS)**

Outgoing Mail Server Type: **SMTP**

Outgoing Mail Server: **mail.amplex.net**

Outgoing Server Port: **587 (Encrypted/STARTTLS)**

Make sure to enable **outgoing server requires authentication** is enabled.

For your e-mail username, use your full email address, including the @amplex.net portion of the email.

Amplex servers support TLS encryption, and all new email accounts require it.

The port number for TLS security for IMAP is 993. The port number for TLS security SMTP is 587.
