

Partner Pickup Locations

Amplex is proud to announce that many of our local business partners have agreed to be pickup locations for our customers who may need a replacement power supply or Ethernet jumper cable. These are available for any customer to pickup, free of charge, should our technical support agents recommend a replacement power supply or Ethernet jumper cable is needed.

The partner name, location and phone number are listed below. While our partners have graciously agreed to be a pickup site they do not have representatives trained to support Amplex systems so any technical questions regarding your service should be directed to Amplex support at 419-837-5015
