

Thunderbird E-mail Setup

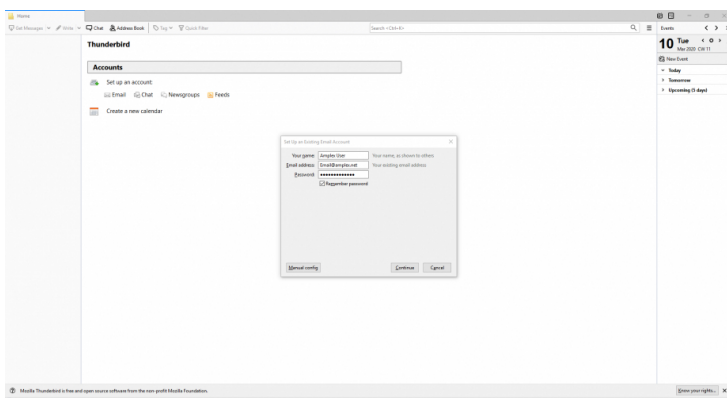

To setup Thunderbird for the first time, start by opening Thunderbird. You should see this screen on the initial startup.

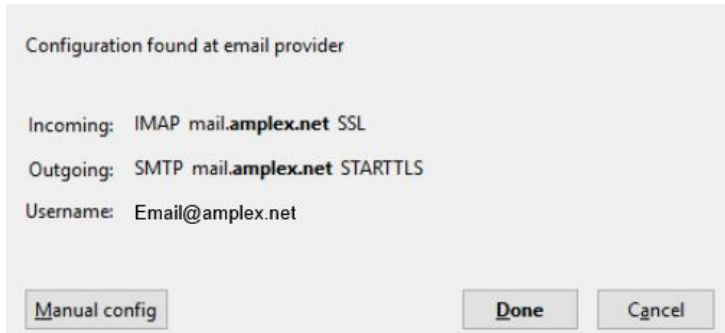

Click on **Email** under **Set up an account**:

In the empty box next to **Your name** **type your name as you would like it to appear** in e-mails you send. In the empty box next to **Email address**: **type in your full e-mail address including the @amplex.net**. In the empty box next to **Password** **type your e-mail password**. Click the **Continue** button.

Thunderbird will try to automatically detect your settings. If you have entered the proper email and password, you will see the following message under the previous informatio. Success! ClickÂ **Done** to finish the setup.

You are now able to enjoy your Amplex email in Thunderbird.
