

New Amplex Support Site Launched

Amplex Internet has always prided itself in delivering exceptional customer service with LOCAL technical support for all of our internet and phone customers. While our customers have complimented the knowledge and skill of our support staff over the phone, in letters and on social media we know the more resources to assist our customers the better.

Today we are proud to announce the launch of the new Amplex Support and Knowledge Base website. This site will allow our customers to access easy help guides, technical advice and advanced setup tips and tricks any time of the day or night.

Integrated into the knowledge base is a powerful search bar which allows anyone to locate helpful guides by simply searching for a keyword or phrase. With easy to read pages formatted to provide perfect printing it's always simple to get the help that our customers need.
